c-more programming software full version
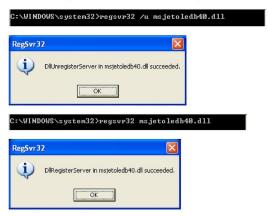

GUI-121 Error Information

In the event that a customer receives a GUI-121 error from the C-More Programming software, it is indicative that their Windows XP environment is missing a registry reference to a Microsoft Jet 4.0 Database component.

Specifically, the DLL "**msjetoledb40.dll**" is not registered in the Windows registry.

In order to fix this problem, the user can run the following commands from the windows command line.

At this point, the C-more Programming Software should start normally.
